

Seismic forecast for Japan

2025 June/Juy

1 day resolution (trial)

Following the numerous requests of having a handy 1 day resolution seismic forecast, we trained our neural networks in order to produce a better refined 24 hours timed trend line graph.

Forecast components: ***Energy / Latitude / Longitude***

Geographical area used for this forecast	Coordinates range	
	min lattitude 29	max latitude 46
	min longitude 128.4	max longitude 147

Notes: This forecast use a *trend* forecasting system and *real values can change largely*, depending the scale interpretation of the neural network output.

Energy forecast

Period:
2025 June 18-27
2025 July 09-17

date	Mag	latitude
2025-06-23	≥ 6.5	> 40
2025-07-11	≥ 7.0	< 40
